COA

Strain Name

T36

Genetics / Heritage

T36 is a hybrid cultivar created by crossing: **OGKB 2.1 × Strawberry Guava**

The OGKB 2.1 parent contributes structure, density, and high cannabinoid potential, while Strawberry Guava adds fruit-forward aroma characteristics and color expression. The combination results in a balanced hybrid with strong potency and consistent patient experience.

Cultivation Details

- **Grow Type:** Indoor
- **Substrate:** Stonewool
- **Lighting:** HPS
- **Environment:** GACP & GMP Certified
- **Focus:** Consistent flower development, resin production, and stable cannabinoid levels
- **Drying:** Hang dried
